DETAILED ACTION

Allowable Subject Matter

1. Claims 58 and 60-83 are allowed.

Regarding Claims 58, 69, 72, and 78, Wilk discloses a method and device for telephone call answering by a callee (Abstract, Column 1 Lines 6-10, Column 2 Lines 14-17). Specifically, the callee has a wireless telephone with a memory (Column 3 Lines 30-35, Fig. 1). Said wireless telephone memory stores a plurality of predefined outgoing messages (by inherency, each outgoing message will be associated with a binary number identifier) (Column 3 Lines 30-41, Column 4 Lines 10-30). The predefined messages may be provided in a plurality of languages (by inherency, each language offered will be associated with a binary number identifier) (Column 7 Lines 24-30). The callee selects a particular outgoing message and plays the selected message for the caller (who may also be using a wireless telephone) (Column 5 Lines 49-62, Fig. 2).

Wilk does not disclose the practice whereby a first wireless communication device transmits one of a plurality of codes, each code corresponding to a particular message in a particular language, to a second wireless communication device, the second wireless communication device containing each of the plurality of codes and the associated message for each code, the second wireless communication device retrieving from its memory the message associated with the received code. No prior art reference was

found that discloses this feature. Therefore, Claims 58, 69, 72, and 78 are allowable over the prior art.

Claims 60-68, 70-71, 73-77, and 79-83 depend on Claims 58, 69, 72, and 78, respectively, and therefore are also allowable over the prior art.

Response to Arguments

2. Applicant's arguments, with respect to Claims 58 and 60-83 have been fully considered and are persuasive. The rejections of Claims 58 and 60-83 have been withdrawn.
